did not see in your link, but both the (8) NPS Management Plan components, and the (9) ws-based plan elements are included respectively as Appendix A (p. 53) and Appendix C (p. 63) of attached 319 guidance:

Sorry to bother you. I am using this reference: From: EPA's Handbook for Developing Watershed Plans to Restore and Protect Our Waters, March 2008, EPA 841-B-08-002.

Subject: RE: 9 key elements and the elements that a watershed plan

Hi Don:

Ex. 6 - Personal Privacy The "nine" key elements of a watershed-based plan are the same as always, have not changed. The original nine components of a "NPS Management Plan" were revised more recently and now only consist of "eight" components. Hence the confusion by folks. I believe both of these are each appended to the new 319 Guidelines and was what I (and Gene) sent out before. Let me know if this helps-

thanks

Rick

Pls. send me the 9 key elements and the elements that a watershed plan should contain. I am confused on the two. The last I think has only 8 elements. Thanks, Don
